6.1.4 Download

[Function explanation]

[Function outline]

Downloads data from u-DIEX to the client computer's local disk.

*This overview indicates the following process: Hanako Seizou downloads Propeller shaft from the location '/Part Estimate Service/Requests/' at u-DIEX.

[Main functions]

(1) Types of data that can be downloaded

All available data at u-DIEX can be downloaded. Two or more data can be uploaded by the operation once.

*See Section 9.1 "Data name" for Data name and definition by downloading.

(2) Retry function

The retry function attempts to resume a download that has been interrupted by the occurrence of a communications problem.

[Other functions]

(3) Character set conversion

Character set of Post-downloaded data can be modified.

*See Section 9.5 "Character set" for details.

(4) Transfer mode

Selects "Batch transfer" or "One-by-one transfer".

- •Batch transfer --- downloading all data at once
- •One-by-one transfer --- downloading the data files one at a time.

*See Section 9.6 "Transfer mode" for details.

[Operating explanation with the screens]

Explains the download procedure in the overview by using Web-EDI screen.

-Specify Current Address

- (1) Select the folder or package-folder that store the data being downloaded from folder tree.
- (2) Tick off the data being downloaded.
- (3) Click "Download" button.
- < (Web-EDI) Data List>
