6.1.7 Delete

[Function contents]

[Function outline]

Deletes the data from u-DIEX.

*This overview indicates the following process: Taro Sekkei deletes Propeller shaft from the location '/Part Estimate Service/Requests' at u-DIEX.

[Main functions]

(1) Types of data that can be deleted

Files and packages can be deleted. When packages are deleted, all package-files and package-folders in the package will be deleted at the same time.

(2) Types of data that cannot be deleted

Package-files and package-folders cannot be deleted one by one.

[Operating explanation with the screens]

Explains deletion procedure in the overview by using Web-EDI screen.

-Specify the data being deleted

- (1) Select the folder that stores the data being deleted from folder tree.
- (2) Tick off the data being deleted.
- (3) Click "Delete" button.
