# 9.9. Time display

In case of Web-EDI, time is displayed and input by the time zone in the operating terminal.

[Important notice about summer time]
  u-DIEX adopts the specified time in spite of summer time/standard time.

  e.g.) In case a data that expires at 15:00 on 1st December was created on 1st August (summer time), it will be deleted at 15:00 on 1st December (standard time).

In case of Communications components, time is displayed in JST (GMT+09:00).
When specifying a time, it should be converted to Japan standard time.
